# EXAMPLES OF REVISOR INSTRUCTIONS

The following are examples of revisor instructions from recent legislative sessions. These examples have been modified from the original legislation to follow the patterns adopted by the Office of Legislative Research and General Counsel in this *Legislative Drafting Manual 2008*. However, the substance of the legislation has not been reviewed, which may have required departure from general drafting principles. An ellipse is used when substantial language is omitted. This is not a complete list of all revisor instructions.

## NOTES:

- Under the "Other Special Clauses" section of the long title of each of these bills there is a statement that: "This bill provides revisor instructions."
- When possible, a revisor instruction should specify the section in which changes are needed and not direct that changes be made throughout a bill.
- When referring to a cite in the *Laws in Utah*, if you want the section number included with the chapter number, the revisor instruction should reference the "chapter and section number." If revisor instruction only references the "chapter number," only the chapter number will be included in the version of the statute included in the Utah Code database.
- If revisor instructions direct the Office of Legislative Research and General Counsel to renumber a section, a drafter should determine if there are any related cross references that would need to be changed, and if so, direct the Office of Legislative Research and General Counsel to make those changes when preparing the Utah Code database for publication.
